Specialization and professional skills

I develop and investigate on Python, Node.js, Perl, Bash with OSINT, community & DevOps activities and practices. Sometimes I hire targeted for positions in the IT level from middle+, with relocation outside Russia, write about hiring in IT, HR Tech, development and participate in various professional communities. I do not consider offers from russian corporations, state structures, and office work within Russian Federation. Now I leave Russia.

Work experience

Dec 2021 - Present, NDA, outside the Russian Federation, Python, Node.js, Perl Developer & Investigator

I develop backends and various automations and investigations on Python, Node.js, Perl. I do some server logic, REST API, imports, exports, data parsing, scrapers, data enrichment and various other tricky things. Sometimes I am very targeted in hiring for IT companies (remote job and relocation outside Russia), market analytics, and help in the development of professional communities.

Nov 2015 - Nov 2021 GoodJob Hiring Agency, Novosibirsk, Russia - Owner

A small warm tube recruitment agency. Recruitment geography: Novosibirsk, remote location, relocation from the Russian Federation to Europe (I took more than 150 people outside the Russian Federation). Hiring candidates in IT from the middle level. Automated candidate database of 30+ thousand people. He created his own community, for 6 years he has gained a lot of connections and insights among different companies, incl. outside the Russian Federation. Advised companies and candidates. At different times in the team from 1 to 6 recruiters.

Jun 2019 - Mar 2021 Improve Group, Novosibirsk, Russia - IT Head Hunter

The best all-time IT company in Novosibirsk, mobile application development. Hiring employees, hiring employees, hiring employees. First he worked under a contract, then in the state. The company closed in 2021.

Technology stack

- Python, Node.js, JavaScript, Perl
- PostgreSQL, MongoDB, MySQL, Redis, Celery, RabbitMQ
- AWS (EC2, Amplify, S3, RDS, Route 53, DynamoDB), ClickHouse, Prometheus, Grafana, Zabbix, Jira administration
- Async.IO, AIOgram, Google API, Nest.js, Express, REST API, Swagger, and some frameworks & tools for highload, queuing, mutli threading, multi processsing, sharding, etc.
- Bash, Selenium, Puppeteer, Apify and at different times a bunch of all sorts of exotics, mainly integration, for parsing, scraping, crawling and data enrichment
- Linux (Ubuntu, Debian, Kali, Amazon Linux, Arch Linux, Parrot OS, Mikrotik OS, CentOS, FreeBSD), MacOS, Windows, Virtualization (VirtualBox, Vagrant, VMWare), Docker - at the level of normal, advanced in places, DevOps. I have the talent to install and configure any software so that it works on any systems and configurations
- C++ as a secret rarely used skill, Delphi, Embarcadero, VBScript as oldfag)
- Java, .NET - at the level of "I can, but without fanaticism"
- PHP - at the level of "collect or fix something quickly"
- Vue, React - at the level of understanding how it works (there is no industrial experience in frontend development). UX, Figma, CSS, Styles - I can make it nice if needed

Education

Novosibirsk State University

1997 - 2002, Faculty of Mechanics and Mathematics, specialty programming
